

SENSAPHONE Monitoring Sensor

General Accessories

2.8K Weatherproof Temperature Sensor

Description

The 2.8K Weatherproof Remote Temperature sensor enables monitoring temperatures at a location away from a Sensaphone unit. It will measure and report the exact temperature back to the Sensaphone unit to which it is attached. The Sensaphone can be programmed to trigger an alarm when conditions exceed the set high or low temperature limits. It may be mounted anywhere air temperatures need to be measured and is suitable for use in wet, dirty environments. This is a highly recommended sensor for every cold storage application above -20°F. For colder temperatures we recommend using sensor part number FGD-0101-TEF.

Temperature Range:

- 400, 800:** -20° to 150°F (-30° to 65°C)
- 1400, 1800, 2800, WEB600:** -20° to 115°F (-28° to 46°C)
- 2000:** -20° to 123°F (-28° to 51°C)
- Express II:** -20° to 200°F (-28° to 93°C)
- SAT4D:** -20° to 124°F (-28° to 55°C)

Package Contents

- (1) Temperature sensor
- (1) 12' wire
- (1) Installation instructions
- (1) Mounting Hardware

Specifications

Temperature Range:
Differs depending on Sensaphone model. See above

Accuracy:
± 1°F

Compatibility:
400, 800, 1400, 1800, 2800, 2000, WEB600, CELL682 and Express II
